

**TOGETHER**  
WE MOVE  
MOUNTAINS

*We are connected, we do what we promise, this is the only way we can trust each other and build on each other*

## “After 70 years, still a healthy family business”

In almost 70 years, Verhoeven has become a household name in the world of earth-moving machines, undercarriage parts and equipment. What was once started by our father and grandfather Tinus is now in the hands of the second and third generation. A company that we are proud of as a family. Our aim is to still be a healthy family business in 70 years' time.

The origins of our company are deeply rooted in the family values that have shaped us and drive us in everything we do. We are **entrepreneurial**, always on the move and constantly looking for novelties. We are characterised by innovation and creativity.

We are **connected**, we do what we promise, this is the only way we can trust each other and build on each other. This connectedness creates a strong bond and promotes loyalty and long-term cooperation.

Our approach is **no-nonsense**, we value simplicity and efficiency over popularity and boasting. And what's more, we like to have fun. We are serious when we have to but generally operate in a casual and relaxed atmosphere.

These values not only apply to our family, but they also form the core of our business towards our customers, suppliers and employees. These values form the basis of what sets us apart from other companies. This brochure represents what we have built together over the years. We hope you will enjoy reading it and look forward to continuing to grow and innovate together with you.

*The Verhoeven Family*

# Almost 70 years of experience

Verhoeven International is a family company with almost 70 years of experience in earth-moving machines, undercarriage and attachments. Shortly after World War II, Tinus Verhoeven and his brother started welding up undercarriage parts of earth-moving machines. These excavators worked on the reconstruction of the Netherlands.

### Third generation on board

In the following years, the activities of the overhaul and welding company were expanded to include the sale of earth-moving machines. Later, through the leadership of son Gerard, exports also began to take shape. With Martijn and Iris, the third generation is now also on board.

### Three branches, four areas of expertise

In almost seven decades, Verhoeven International has grown into a company with over 200 employees spread over three branches in Maarheeze, Zeewolde and Ninove (B). We are here for you in four areas: earth-moving machines, undercarriage, attachments and service (maintenance and repair).

### Operating worldwide

Besides our operations in the Benelux, we sell undercarriage parts of top brand VemaTrack in the rest of the world. This is facilitated through the VMT International global dealer network. In Benelux and Germany, in addition to VemaTrack, we also offer Italian Berco through our companies Raupen Technik Deutschland (RTD) and Verhoeven Rijkwerk. And for the heavier undercarriages required in, among others, the mining industry, you can turn to RTD mining. You can read more about our companies and brands on the following pages.

*In almost seven decades,  
Verhoeven International has  
grown into a company with over  
200 employees spread over three  
branches*

## Part of the Verhoeven Group

Verhoeven International is part of the Verhoeven Group. In addition to Verhoeven International, Wilhelm Schäfer GmbH and Verga are also part of the group. German company Schäfer is the importer of Takeuchi earth-moving machines for Poland, Bulgaria, Latvia, Lithuania and Germany. The company was acquired by Gerard Verhoeven in 2014 and delivers more than 3,000 earth-moving machines in these countries every year.

India-based Verga is one of the world leaders in designing and manufacturing attachments such as excavator buckets, rippers, quick couplers and demolition-sorting grabs. The company was founded in 2006 by Mehul Gandhi and Gerard Verhoeven. It has two sites employing 400 people. 5,000 Attachments are produced every month, including the buckets of our VemaTec brand are made by Verga.

Together with Verhoeven International, the three companies form a rock-solid alliance in earth-moving machinery, parts and attachments.

# VMT International & VemaTrack

VMT International supplies VemaTrack undercarriage parts for all types and brands of machines. This Verhoeven International brand stands for consistent high quality and attractive prices. Additionally, we have the largest stock of rubber tracks in Northwest Europe with no less than 3,000 rubber tracks of more than 300 different types.

*VMT has become  
an absolute global  
player over the  
years*

## Dealer Support

VMT works with a dealer network from all over the world. All partners are carefully selected. The focus is on the long term. This applies to the lifespan of VemaTrack products, but also to the partnerships we enter into with dealers. We value our core values. That is why VMT is a supplier that lives up to its commitments.

## VMT International's core values

VMT International and our VemaTrack dealers have a number of core values to which we attach great importance.

### Fast delivery

Short delivery times of undercarriage parts are essential, because you want to get back to work as soon as possible. That is why we keep stocks local, so that everything can be shipped quickly.

### Guaranteed quality

VemaTrack parts are solid, robust and wear-resistant. By using feedback from the field, our R&D department can continuously further develop the undercarriage parts. We also carry out constant quality checks.

### Complete range

Undercarriage parts fit all common machine brands. With this complete range of products, we ensure that we always have a suitable solution for our customer.

### Unrivalled market knowledge

VMT International is part of Verhoeven International, which has almost 70 years of experience in the field of undercarriage parts. We develop new knowledge based on this experience. We know what our target group values.

### Advantage of a world player

Undercarriage parts from VemaTrack are sold all over the world through our dealer network. We use this global expertise to provide the answer to the demand for high-quality undercarriage parts. At solid prices tailored to local needs.

### Deal = deal

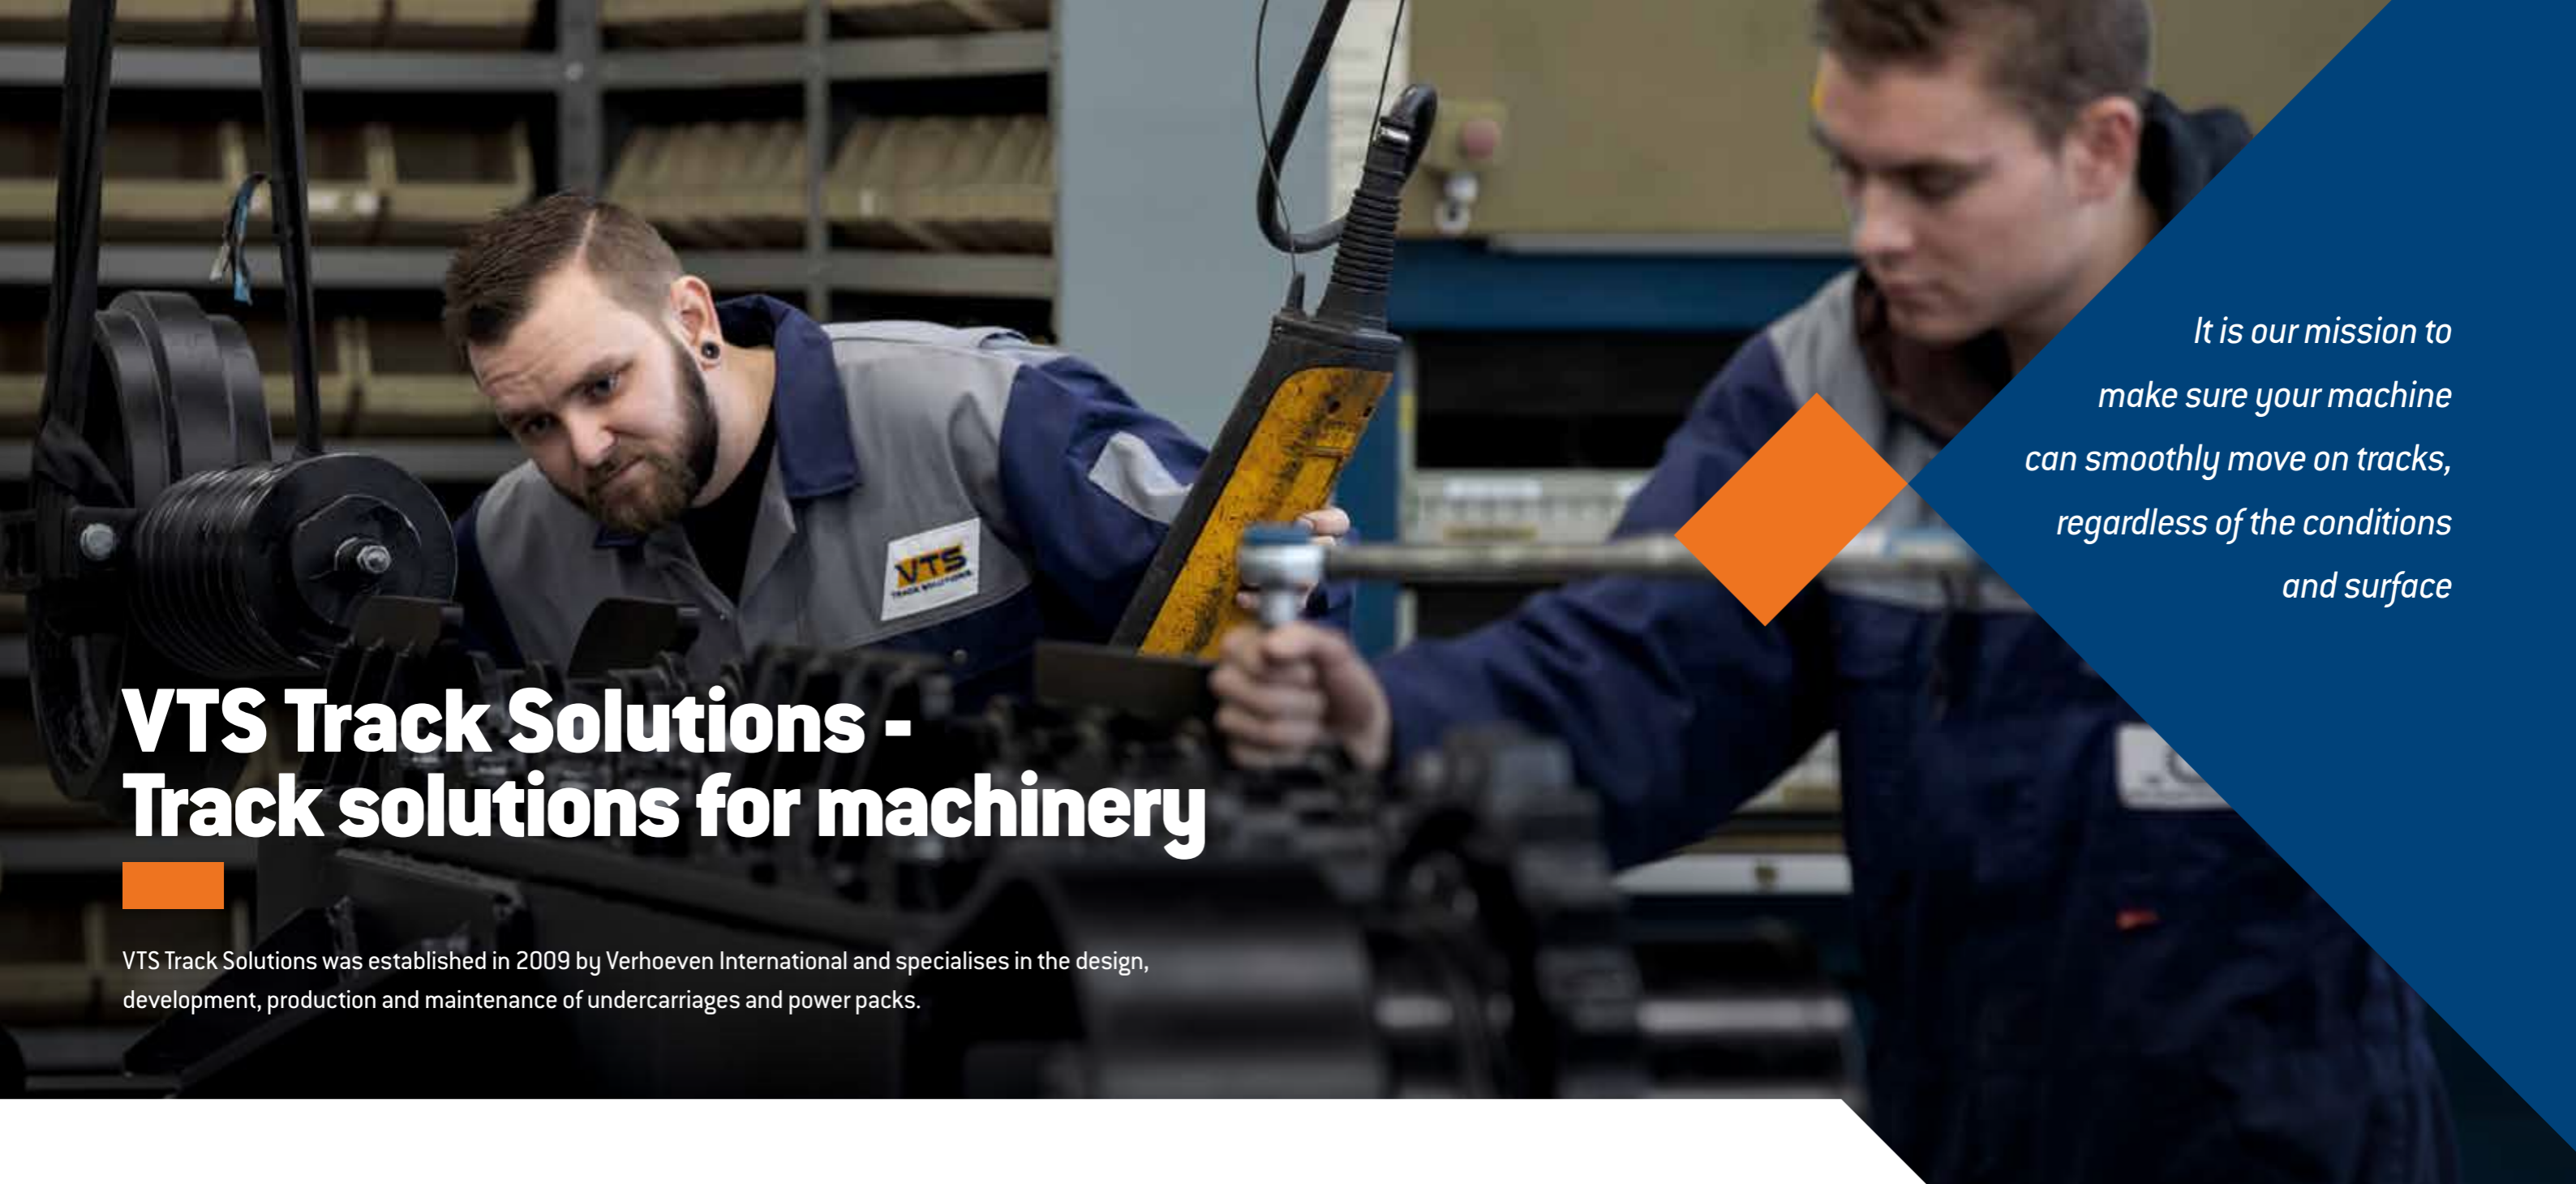

Our most important promise: we always keep our word. With delivery times that you can rely on, correct shipments and quality that you can put your confidence in. We always deliver.

**VemaTRACK®**

*It is our mission to  
make sure your machine  
can smoothly move on tracks,  
regardless of the conditions  
and surface*

# VTS Track Solutions - Track solutions for machinery

VTS Track Solutions was established in 2009 by Verhoeven International and specialises in the design, development, production and maintenance of undercarriages and power packs.

VTS was created because there was a growing demand for fully operational undercarriages. It is our mission to make sure your machine can smoothly move on tracks, regardless of the conditions and surface.

We offer fully operational track systems for several applications, including aerial work platforms, foundation machines, agricultural machines, cranes and many other applications.

## **Undercarriages and power packs**

For powering undercarriages, we develop, manufacture and install high-quality power packs. In combination with the undercarriage, a total concept is created: the track-mobile solution.

The power pack drives the undercarriage, but can also be designed to meet all the machine's energy needs. This sets us apart in the market, because we build not only the undercarriage but also the power pack, completely in-house and customer-specific.

VTS' tracked power packs are extremely flexible and designed for loads ranging from 300 to 200,000 kg. We offer a range of options, including rubber tracks, steel tracks, extendable tracks and high-speed tracks.

Whether you choose from our stock models or prefer a customised solution, our approach is efficient and based on standard components and modules. This results in perfectly fitting customisation, competitive prices and fast delivery times.

**For more information about VTS Track Solutions, go to [www.vtstracksolutions.com](http://www.vtstracksolutions.com)**

*Our approach is no-nonsense, we value simplicity and efficiency over popularity and boasting*

## Fargo Drives - Takes you everywhere

For top-quality final drives, you can turn to Fargo Drives since 2014. This global supplier started as part of VTS Track Solutions, but has since grown into an independent company within Verhoeven International.

When the final drive of your track-driven machine is worn out, you can replace it by an original final drive. Fargo Drives, however, offers a smarter solution: an alternative final drive of the same quality and specifications as the original. But with two key advantages: faster delivery time and a lower price.

For more information go to [www.fargo-drives.com](http://www.fargo-drives.com)

### **Order your final drives directly online**

When your final drive needs to be replaced, of course you want it fixed as soon as possible. At [www.fargo-drives.com](http://www.fargo-drives.com), you can directly order replaceable final drives for your machine. We guarantee that the final drives will fit the machine you enter in the search bar.

In the Fargo Drives webshop you will find final drives of our own brand, but also of other top brands, such as Doosan or Bonfiglioli. This way, we ensure a wide range so you never have to wait long for a suitable final drive.

### **Directly available**

Our final drives are competitively priced, available directly from stock and come with a 1-year manufacturer's warranty as standard. If you order a product in stock before 15:00 on a working day, we will ship it the same day!

# RTD Mining

RTD Mining is a specialist in undercarriage parts for machinery in the mining industry around the world. Is the undercarriage of your excavator or bulldozer worn out and are you looking for replacement parts? Then you've come to the right place at RTD Mining.

### The best undercarriage parts from top brands

We will get you back to work as soon as possible. Our undercarriage parts are from the brands Berco and VemaTrack and are of the best quality. All products are tested under the most demanding conditions to ensure optimal performance on any terrain.

### Get a quote for the right undercarriage components

Simply request a quote for your desired undercarriage parts via RTD Mining's website. Fill in your machine, so we can immediately find out which undercarriage parts are suitable for your machine.

We will then take care of your request as soon as possible. Benefit from fast delivery and competitive prices.

Do you need more information? Check out our website [www.rtdmining.com](http://www.rtdmining.com)

MINING

# Raupen Technik Deutschland

Raupen Technik Deutschland supplies undercarriage parts in Germany. RTD has now grown into a major player in the market. We have an enormous amount of knowledge and experience in the field of undercarriage. You can always come to RTD for high-quality parts and advice.

### Top brands VemaTrack & Berco

RTD offers a range of two top brands: Berco and VemaTrack. Verhoeven's own brand, VemaTrack, supplies wear-resistant, solid and robust undercarriage parts with an excellent price-quality ratio.

If you choose the Italian brand Berco, you will benefit from the best quality undercarriage parts in Europe. Berco has been number one when it comes to undercarriage parts for decades.

### Order new undercarriage parts online

Order the right undercarriage parts for your machine easily online at [www.raupentechnik.de](http://www.raupentechnik.de). In the webshop, you can search for the suitable parts by entering the brand and type of your excavator, OEM number or the dimensions of your rubber tracks. The result gives the right undercarriage parts that you can order directly.

You always benefit from attractive prices and fast delivery. For all parts in stock, they are shipped the same day if you order them on working days before 15:00.

For more information, go to [www.raupentechnik.de](http://www.raupentechnik.de)

RAUPEN TECHNIK DEUTSCHLAND

# Takeuchi Benelux

Verhoeven International has been the exclusive importer of Takeuchi machines in the Benelux for more than 25 years. This Japanese brand represents the absolute top in mini-excavators, midi-excavators and skid-steer loaders. The range extends from the smallest 1-tonne TB210R, which even fits through a standard door, to the enormously powerful 15-tonne TB2150.

## Ready for the real job? Choose a Takeuchi excavator

Professionals all over the world trust our earth-moving machines blindly. That's why we make excavators that keep going, one hundred percent reliable & indestructible. The long service life and high residual value of each Takeuchi make the investment more than worth it.

All our excavators are designed with humans in mind. Comfortable, powerful and intuitive – an extension of the professional. Everything works exactly the way you want it to work. In addition, there are numerous options for extensions and customisation. These range from installing an overpressure system, building in LED lights and step-up grilles to delivering the excavator in your desired corporate colours.

## Total control, anytime, anywhere

Takeuchi is the result of more than 50 years of innovation and continuous development. For Benelux, we translate high-end Japanese technology into solutions that perform best in your working area.

You can also contact Takeuchi Benelux for spare parts for your machine. And of course we are at your service when your Takeuchi needs (emergency) service, maintenance and/or inspections. This can be done in our workshops in Maarheeze, Zeewolde or Ninove. And with our fully equipped service vans, we can come to your premises to carry out repairs, maintenance and safety inspections.

## Takeuchi partners

Takeuchi Benelux has branches in Maarheeze, Zeewolde and Ninove. We also work with a network of Takeuchi partners across Belgium and the Netherlands. You can contact these partners for either the purchase or rental of a machine, for parts or service. Many of our partners offer all these services.

For more information about Takeuchi Benelux, go to [www.takeuchibenelux.com](http://www.takeuchibenelux.com)

# TAKEUCHI

# Schäffer Netherlands

Schäffer Netherlands has been the Dutch importer of the wheel loaders of the German brand Schäffer since 2020. With more than 40 different Schäffer models, we always offer the right wheel loader for your application in the agri- or construction sector.

## The driver of the Schäffer wheel loader takes the main focus

The way Schäffer wheel loaders are designed and manufactured is unique. The basis of this absolute difference is the experience of more than 60 years. The focus when developing Schäffer shovels is on the wheel loader operator. We want to make his work safer, more comfortable and more profitable.

Schäffer wheel loaders are characterised by very high quality materials and a long service life. This is also the reason why many Schäffer users stay loyal to the brand for a very long time. The smoothness of driving, the power when picking up a load and the large volumes that the wheel loaders can lift are major advantages.

## Extensive product range

The product range includes (mini) wheel loaders up to 6 tonnes and telescopic wheel loaders up to 13 tonnes. A selection of electric excavators is also available. The wheel

loaders for the agri sector have the characteristic red Schäffer colour. The loaders for construction and industry are yellow. The wheel loaders for construction & industry feature a lower front carriage and a powerful lifting cylinder with a weighted lifting frame. Schäffer Netherlands staff and our dealers will be happy to inform you about the numerous applications and the various set-up options.

## More than 30 dealers

Schäffer Nederland has its headquarters in Zeewolde and more than 30 affiliated dealers throughout the Netherlands. Therefore, there is always a dealer nearby where customers can go for information and purchase a machine or spare parts. They can also go there for repairs and service.

For more information, go to [www.schaffer.nl](http://www.schaffer.nl)

# Schäffer

# Get the job done

**Vema TRACK®**

# Verhoeven Rijwerk & VemaTec

## Verhoeven Rijwerk

Verhoeven Rijwerk is the supplier of undercarriage parts in the Benelux countries. You can go there for advice and top-quality parts. In our product range you will find two leading brands: Berco and VemaTrack.

VemaTrack is our own brand and has solid, wear-resistant and robust undercarriage parts with the best price-quality ratio.

Berco has a decades-long track record and is acclaimed as the number one in undercarriage parts. In 80 years, Berco has developed into the leading manufacturer of undercarriage repair and overhaul parts, specialising in earth-moving machines (excavators, bulldozers, etc.).

You can also contact Verhoeven Rijwerk for rubber tracks.

For more information, go to  
[www.verhoevenrijwerk.com](http://www.verhoevenrijwerk.com)

## VemaTec

Our own brand VemaTec is known throughout the Benelux as a quality brand in attachments. High-quality materials, reliability and service are always top priorities at VemaTec. The products are tested under the toughest conditions to ensure optimum performance on any terrain.

Through our webshop, we sell equipment such as buckets, quick-change couplings, rippers and demolition hammers of our own brand. We are also importers in Benelux of Auger Torque, Esco and Cazo, expanding our range to include augers, blade steel and demolition-sorting grabs.

## Perfect value for money

VemaTec equipment has a perfect price-quality ratio and a very wide range of equipment for excavators. Based on the latest techniques and market demands, VemaTec's product range is constantly evolving.

## Order the attachments easily online

Looking for new attachments for your excavator? You can find our wide range of products at [www.vematec.com](http://www.vematec.com). You can order various products directly, or simply request a quote.

**VemaTEC®**

# TOGETHER WE MOVE MOUNTAINS

Verhoeven moves mountains to meet your needs. By brainstorming with you about different aspects, we will help you find the most optimal solution for you. We keep digging in order to do things even better. This commitment and dedication are the hallmarks of the Verhoeven mentality.

Verhoeven International specialises in earth-moving machinery, undercarriage and attachments. In seven decades, we have become a company with 14 brands, over 200 employees and 5,000 customers worldwide.

Our strength lies in our diversity. We sell only quality brands, including Takeuchi, Schäffer, Berco, VemaTrack and VemaTec. A wide range of products, suitable for a broad category of earth-moving machines. Products which complement and strengthen each other. Whether you are looking for a complete excavator, a separate undercarriage part or an attachment for your machine. At Verhoeven, you have come to the right place.

Exploring a terrain, clearing a road by yourself. Optimistic and enterprising, achieving the best result for our customers. That is what we stand for. In recent years, we have built specialised

online platforms for all our brands and companies where, as a customer, you can not only buy our products, but also benefit from the knowledge we have built up over the years.

Because we believe that the value of knowledge is in sharing it. That is why on our websites we publish tips on how to best use and maintain our products through blogs and instructional videos. This is how we build a long-term relationship with our customers, based on respect and trust.

We keep in touch to get the best out of each other. Colleagues, partners and customers. Whatever your ambitions, Verhoeven goes the extra mile.

*Johan van Rozendaal – CEO Verhoeven International*

*We keep digging in order to do  
things even better*
